2nd May 2014

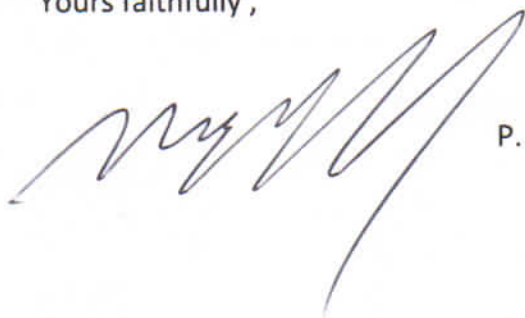

Dear Sirs,

Wave Piercing Crew Boat.

Over the last twelve months I have paid stage visits to SB Engineering during the construction of an aluminium wave piercing crew boat. I have not overseen or supervised construction, but have carried out sufficient examinations to enable me to complete the construction section of the Small Commercial Vessel Code of Practice Compliance Examination.

Prior to the commencement of the build I was consulted on various elements of the concept and design. Since then the builders have consulted me on specific questions relating to construction, outfitting and equipment, with it being clear that care and attention is being paid to the construction and outfitting.

Yours faithfully ,

P. N. LING, I.Eng., FCMS, MCI Arb., MRINA.
