Dear Mr Beadsmoore

Re: MV Tenacity

Thank you for the opportunity to visit the MV Tenacity to carry out some minor system upgrade works.

I found the vessel extremely well equipped and appointed. As an engineer working extensively in the Windfarm Industry, I was particularly impressed with the overall integrity of the vessel including the manufacture quality of the hull. I believe that the Tenacity has unique opportunities in terms of crew transfer applications and duties in the Windfarm and Oil/Gas Industries. Due to the Tenacity's outstanding performance, I believe the vessel would be amongst the best in Europe in a SAR application.

Kindest regards

Adam White
